## ECONOMIC WELL-BEING

Family economic success provides a critical foundation for healthy child development, which, in turn, promotes success in adulthood. Ongoing exposure to economic stress and hardship can negatively affect children's physical and mental health, academic achievement and social-emotional well-being.

DOMAIN RANK

42

## EDUCATION

Establishing the conditions that promote successful educational achievement for children begins before birth and continues into the early elementary school years. With a strong and healthy beginning, it is much easier to keep children on track to stay in school and graduate, pursue postsecondary education and training and successfully transition to young adulthood.

DOMAIN RANK

16

## HEALTH

Children's health is the foundation for their overall development, and ensuring that they are born healthy is the first step toward increasing the life chances of disadvantaged children. Poverty, poor nutrition, lack of preventive health care, substance abuse, maternal depression and family violence can put children's health at risk, affecting later outcomes.

DOMAIN RANK

39

## FAMILY AND COMMUNITY

When children are nurtured and well cared for during their first five years, they have better social-emotional, language and learning outcomes. These lead to more positive behavior and academic achievement in their later years. But when families and neighborhoods lack sufficient human and social resources, children's well-being can suffer.
