

2018 MINNESOTA PROFILE

TRANSITION-AGE YOUTH IN FOSTER CARE

The transition from adolescence to adulthood is a pivotal developmental stage as young people learn the skills needed to be healthy and productive adults. This process can be complicated for youth with foster care experience. Here's what we know about the experiences of these youth in Minnesota.

171,162 or 25%

of United States' foster care population is ages 14+

4,067 or 28%

of Minnesota's foster care population is ages 14+

United States Foster Care Population

Minnesota General Population

Above charts are based on the three largest racial and ethnic groups in this state for foster care. For additional data, please visit the KIDS COUNT Data Center, <http://datacenter.kidscount.org>.

Youth in Foster Care by Age

Youth in Foster Care by Sex*

* Sex is based on gender at birth.

In addition to the trauma of abuse or neglect that resulted in being removed from their homes and placed in the foster care system, experiences while in foster care — including frequent moves — can lead to worse outcomes for youth. Looking at these indicators helps us understand how youth with foster care experience in Minnesota are faring and provides insight into the changes needed to improve the lives of these young people.

Episodes in the Foster Care System

Number of Placements During Most Recent Foster Care Episode

MINNESOTA 2+ Foster Care Episodes

MINNESOTA 3+ Foster Care Placements

UNITED STATES 2+ Foster Care Episodes

UNITED STATES 3+ Foster Care Placements

The percentage of young people in each racial and ethnic group who have experienced multiple foster care episodes and placements.

Time in Foster Care by Exit Outcome or Type

	MINNESOTA	UNITED STATES
PERMANENCY	6 months	13 months

Services

Transition services, such as vocational training and housing assistance, are designed to help young people with foster care experience transition to adulthood. Participation in federally funded transition services provides a window into how well young people are being equipped for employment, education and housing.

Young Adult Outcomes by Age 21

Research shows that young adults who experienced foster care have worse outcomes than their peers in the general population across a variety of spectrums — from education to employment to housing to early parenthood. Examining data on these outcomes in Minnesota is important as we strive to improve the practices, programs and policies that help ensure these young people have the relationships, resources and opportunities they need for well-being and success.
