## **South Dakota Ranks 24<sup>th</sup> in Child Well-Being, but Children Still Suffering from Mental Health Pandemic**

South Dakota continues to rank in the middle of the pack for children's well-being, according to the **2022 KIDS COUNT® Data Book**, a 50-state report of recent household data developed by the Annie E. Casey Foundation. Compared to a decade ago, South Dakota has improved in many areas of children's well-being, however, thousands of families still struggle to afford housing, and many make poverty-level wages. Another area of significant concern is that children are struggling with anxiety and depression at unprecedented levels. The annual resource focuses this year on youth mental health, concurring with a recent assessment by U.S. surgeon general that conditions amount to a youth mental health pandemic.

Data from the report show an alarming number of South Dakota youth experience mental health challenges. In 2020, more than one in seven South Dakota children experienced depression or anxiety. Unfortunately, disparities exist for youth of color, and Latinx, American Indian, and youth who identify with two or more races experience depression and anxiety at higher rates. These disparities exist because generations of racism and discriminatory policies created barriers for families of color to accessing health care and other economic opportunities.

"Teen suicide death rate is another measure of mental health for youth. Between 2018 and 2020, South Dakota had the second highest suicide death rate in the country, at 34 suicides per 100,000, compared to 11 per 100,000 nationally," said Xanna Burg, Director of KIDS COUNT with South Dakota KIDS COUNT. "Better support for mental health services in South Dakota has been needed for years and is becoming more urgent as the trends get even worse."

Further, many LGBTQ+ young people encounter challenges seeking mental health support. Nationally, among heterosexual high school students of all races and ethnicities, 6 percent attempted suicide; the share was 23 percent for gay, lesbian, or bisexual students. Unfortunately, data specific to LGBTQ+ youth in South Dakota is not available.

Additional highlights from the report findings for South Dakota include:

- **Economic:** About 42,000 South Dakota children lived in households that paid more than 30 percent of their income on housing.
- **Education:** Nearly two-thirds of fourth graders did not read at grade level, showing no progress from two years before.

- **Health:** About 14,000 South Dakota children lack health insurance coverage.
- **Family and Community:** The teen birth rate dropped to a record low in 2020.

The Annie E. Casey Foundation calls for lawmakers to heed the surgeon general's warning and respond by developing programs and policies to ease mental health burdens on children and their families. They urge policymakers to:

- **Prioritize meeting kids' basic needs.** Youth who grow up in poverty are two to three times more likely to develop mental health conditions than their peers. Children need a solid foundation of nutritious food, stable housing, and safe neighborhoods — and their families need financial stability — to foster positive mental health and wellness.
- **Ensure every child has access to the mental health care they need, when and where they need it.** Schools should increase the presence of social workers, psychologists, and other mental health professionals on staff and strive to meet the 250-to-1 ratio of students to counselors recommended by the American School Counselor Association, and they can work with local health care providers and local and state governments to make additional federal resources available and coordinate treatment.
- **Bolster mental health care that considers young people's experiences and identities.** It should be trauma-informed — designed to promote a child's healing and emotional security — and culturally relevant to the child's life. It should be informed by the latest evidence and research and should be geared toward early intervention, which can be especially important in the absence of a formal diagnosis of mental illness.

#### **RELEASE INFORMATION**

The *2022 KIDS COUNT® Data Book* will be available at [www.aecf.org](http://www.aecf.org). Additional information is available at [www.aecf.org/databook](http://www.aecf.org/databook). Journalists interested in creating maps, graphs and rankings in stories about the *Data Book* can use the KIDS COUNT Data Center at <http://datacenter.kidscount.org>.

#### **About South Dakota KIDS COUNT**

South Dakota KIDS COUNT is a leading resource for data on child and family well-being in the state and is dedicated to providing current, relevant, and reliable data to shape the issues affecting South Dakota children and families. More information can be found at [sdkidscount.org](http://sdkidscount.org). South Dakota KIDS COUNT is a project of the Montana Budget & Policy Center, a nonprofit, nonpartisan organization providing in-depth research and analysis on budget, tax, and economic issues. The Montana Budget & Policy Center also leads the KIDS COUNT work in Montana and North Dakota. More information can be found at [www.montanabudget.org](http://www.montanabudget.org).

#### **ABOUT THE ANNIE E. CASEY FOUNDATION**

The Annie E. Casey Foundation creates a brighter future for the nation's young children, youth and young adults by developing solutions to strengthen families, build paths to economic opportunity and transform struggling communities into safer and healthier places to live, work and grow. For more information, visit [www.aecf.org](http://www.aecf.org). KIDS COUNT® is a registered trademark of the Annie E. Casey Foundation.
